Each testing unit should last approximately one hour to 90 minutes and students will then resume their regular school day schedule. You can best prepare your child by making sure he/she gets a good night's rest and a healthy breakfast on the morning of testing. Being on time for school, as always, is also very important. Teachers have been encouraging the children not to be "nervous" about the tests, but to come to school rested and ready to do their best!

Thank you for your consideration.

Respectfully,

James E. Karaba
